

*All India Institute of Medical Sciences Bhubaneswar is one of the 6 AIIMS created by an Act of Parliament in 2012 under the Prime Minister Swasthya Suraksha Yojana (PMSSY). It was created to bridge the regional gaps in health care in parts of the country that were most deprived. AIIMS Bhubaneswar is set to become the Centre of Excellence for medical education, health care and research.*

*The institute is taking its first step towards creating a rich environment to promote physician professionalism, improve the quality of patient care and public health by establishing ethical policies, pursuing research of ethical issues in medicine that practicing physicians are likely to encounter in their training and daily practice and disseminating the code of ethics by developing educational programs.*

*AIIMS, BBSR which is organizing the Continuing Medical Education (CME) program on Ethics in clinical research consists of faculty members from different parts of the country bringing with them varied experiences and expertise.*

*Highly experienced experts from the Indian Council of Medical Research (ICMR) and Ethical Committee, AIIMS, New Delhi have been invited to enlighten us on this subject. With their inputs, this CME shall be interesting and will offer a broader learning experience to the participants regarding the dos and the don'ts of medical practice.*

All India Institute of Medical Sciences (AIIMS)

*The field of medicine is one in which ethical behavior is paramount. This program is intended to impart physicians a deeper understanding of medical ethics and tools to address the ethical and legal questions one comes across in clinical practice and research. It consists of background information on medical ethics, a model for making ethical decisions and an in-depth discussion of a number of contemporary issues like the role of ethics in clinical trials and guidelines for drug development, patenting and publication.*

*Many a times in our clinical practice we might have encountered the following questions:*

- *Is the action I am taking legally right?*
  - *Am I adhering to the tenets of the Hippocratic Oath?*
  - *Does my work conform to the ethical boundaries in scientific research and publishing?*
- Am I respecting the GCP guidelines for clinical trials?*

*If you're looking for guidance or insight into these ethical issues in medicine, then this is the right opportunity*
